

ICSET 2026

Workshops – Call for Abstracts

Submission Guidelines

Important Dates

- Abstract Submission Deadline 30th June 2025
- Abstract Submission Address Please send Abstracts to karen.ginn@sydney.edu.au
- Notification of Outcome 30th September 2025

Workshop Format

- Workshops will be 1.0 to 1.5 hours in duration
- It is anticipated that Workshops will be largely practical sessions in which Workshop participants are, for example, engaged in exploring examination &/or treatment techniques, developing in depth clinical reasoning skills, critically evaluating exercise strategies etc.

Abstracts are invited that:

- explore innovative, evidence-based examination & treatment strategies for shoulder & elbow dysfunction
- incorporate the latest research findings to the clinical reasoning process in the assessment & management of shoulder & elbow dysfunction
- explore innovative ways in which the management of shoulder & elbow dysfunction can be adapted to meet the changing needs of clinical practice

Selection Criteria

- Submitted abstracts will undergo a blind review process conducted by international reviewers.
- Preference will be given to international Workshop teams i.e. consisting of presenters from different countries/regions.
- The following principles will be used to review Abstracts:
 - The significance/importance of the topic addressed in the Workshop to an international audience of shoulder & elbow therapists.
 - The opportunity provided by the Workshop for the development of practical hands-on & clinical reasoning skills.
 - The contribution of the Workshop to the advancement of evidence-based management of shoulder & elbow dysfunction.

Abstract Format

- Workshop Title
- Learning Objectives
- Workshop Description – maximum 500 words
- Presenters
- Presenters' affiliations
- Conflict of Interest Declaration
